- **Public Land and Resource Management**
- **Tax Law**
- **New Government Documents**

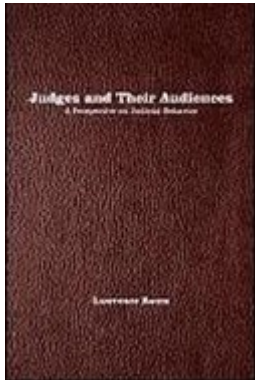

Featured Resource List

Terence P. Ross
Intellectual Property Law: Damages and Remedies
Law Journal Press, 2000

KF2983.R67

This book discusses available relief for the infringement of intellectual property rights. It largely focuses on recovering compensatory damages and the prevention of further violations through injunctive relief. Ross explores damages and remedies at various levels as he covers a wide range of topics including compensatory damages, injunctive relief, punitive damages, remedies that are available for patent owners, attorney fees, and court costs. Other important topics include a discussion of infringement that occurs online and ex parte seizures.

Lawrence Baum
Judges and their Audiences: a Perspective on Judicial Behavior
Princeton University Press, 2006

KF8775.B378 2006

Traditional theory assumes that judges are objective with the intention of making good law. Lawrence Baum argues the exact opposite in this book. He allows the reader to see judges on a human level and points out that they are driven by their desire to be accepted by other people including the public, the legal profession, and even their closest friends. Baum uses research to demonstrate the extent that judges' desire to please their audiences affects their decision making and impacts the law itself.
