### THE NORTH POLE

by Kathan Brown

"It's incredible to me how Kathan Brown has made so much chilling scientific material so human and absorbing. Her life aboard the *Yamal* with its powersaw prow and jiggling tableware is so real to me, I feel I was along. The pictures are unforgettable, and the short history of expeditions makes the background clear and satisfying. The excerpts from Fridtjof Nansen's journal are wonderful luck for all of us. I am ready to testify that *The North Pole* is a truly good book."—John Leggett, author of *A Daring Young Man* (Knopf, 2002), former director of the Writers' Workshop at the University of Iowa, and a former editor at Houghton Mifflin and Harper and Row

### PDU-1

A Novella of the Remote Future

by F.E. Potts

Set in the remote future when all that remains of the human species is the orbiting VR matrix known as PDU-1, this unusual novella addresses the sheer power of memory: memory as the force that defines reality, memory as a manifestation of our desires, and memory in relation to the essence of consciousness and self-awareness. The narrative moves forward with the intensity and complexity of Baroque music, juxtaposing the ancient with the advanced, the comfortable with the unknown, and the peaceable with the polemical. It is a pensive commentary on the nature of our world, our moral integrity, and our responsibilities to ourselves and our descendants.

"PDU-1 is magnificent! It feels to me as though a new Philip Dick or James Blish is being reborn."—Prof. Marvin Minsky, MIT Media Lab and MIT AI Lab

"Finally, a science fiction novel worth thinking about. I hunger like a Virginian for the next installment."—Erik Shonstrom (see web site for full review)

"PDU-1 is a tremendous novella, and belongs alongside *True Names* and *Neuromancer*."—Julian E. Gomez, Ph.D. Senior Staff Engineer, Sun Microsystems

"Not your standard, garden-variety science fiction story."—Mark V. Ziesing Books (from the review in their catalog)

### STARETZ ENCOUNTER

A New Age Thriller

by **Marc J. Seifer**

"A terrifically original book!"—Dr. Stanley Krippner

"Mind-boggling!"—Uri Geller

"Staretz Encounter is so believable that it seems to have its own aura. It frightened me, but not enough to overcome the desire to finish it. Wow!"—Prof. R. Vangermeersch

A former KGB extremist has marshaled a cadre of psionic soldiers to topple the West and restore the empire that was once Russia. His target, the brain of Egyptian superpsychic Abdullah Manu. Reporter, Rudy Styne, uncovers the plot but finds to his horror that he may become their next victim. Seifer's previous work, *Wizard: The Life of Nikola Tesla* has been called "revealing" by *Publisher's Weekly*, and a "masterpiece" by Nelson DeMille.

### HOW TO REMOVE YOUR OWN BRAIN TUMOR

by **I.M. Wyld, MD**

Starting with the observation that Americans are losing more and more of their medical coverage, this manual fills the gap by describing ways to diagnose and treat one of the very worst ailments. While some pundits may claim that the publication amounts to mere satire, inspired perhaps by such works as Jonathan Swift's "A Modest Proposal," which urged the poverty stricken of Ireland to sell their children as food, others will recognize it for what it is: a magnificently illustrated and eminently practical treatise that will lead one through the dark times of governmental indifference. Already the central document in the national health care debate, this book is a must for every household.

#### THE THEATER OF THE IMPOSSIBLE

Baseball as a Free Enterprise Pastime and a Protestant Miracle Play

by Daniel F. McNeill

If the silent drama of baseball could speak, its voice would come from the roots of American culture. What kind of success can scoring a run represent if not capitalistic success? Can salvation in a game mirror anything but Protestant salvation? Mark Twain called baseball "the very symbol... of the nineteenth century." This book tries to

find words and thoughts that express an intimate agreement with the hidden doctrine of a baseball game.
